CAROUSEL SERIES

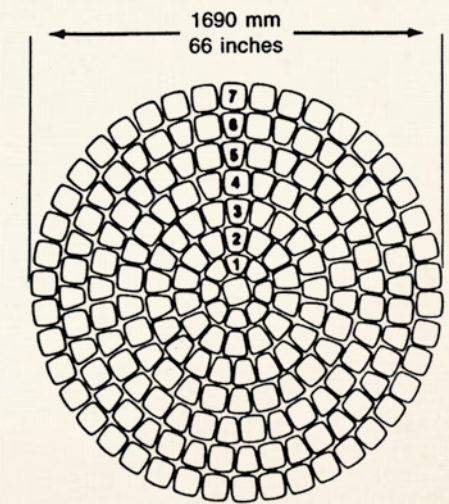

Carousel Stone is comprised of five different shapes – the square, large rectangle, small rectangle, large circle, and small circle. The five shapes are packaged in three different cubes. The Circle Cube contains enough stones to make two complete circles, each approximately 66" in diameter (about 27 sq. ft.). The two remaining cubes (Square and Small Rectangle Cube [SSR] and Large Rectangle Cube [LR]) contain the stones, which allow you to expand the circle and create the many different patterns available with the Carousel Stone style.
